

BRILLIANO DHIYA ULHAQ

Senior Frontend Developer | Fullstack Engineer

+62 851-5543-6436 | brillidhiya@gmail.com | brilli.is-a.dev | Cikarang, Indonesia

PROFESSIONAL SUMMARY

Senior Frontend Developer and Fullstack Engineer with 6+ years architecting scalable web and IoT platforms using Next.js, React, and TypeScript. Deep expertise in performance engineering (SSR/ISR, Core Web Vitals), secure authentication (OAuth 2.0, Row Level Security, SSO), and AI-integrated product features. Combines hands-on system architecture with technical team leadership, translating business requirements into production-grade solutions for enterprise and international clients.

KEY STRENGTHS

- Performance & SEO Architect:** Deep expertise in Next.js optimizations (SSR/ISR), dynamic SEO (JSON-LD), and achieving top-tier Core Web Vitals
- Scalable Infrastructure:** Enterprise-grade security using SSO (Keycloak, Supabase Auth) and database hardening with Row Level Security (RLS)
- Hands-on Technical Leadership:** Owning the full project lifecycle while leading core development and system architecture

PROFESSIONAL EXPERIENCE

80&Company | Kyoto, Japan (Remote)

Nov 2025 – Feb 2026

IT Project Manager (Freelance Technical Lead)

- Led full-stack development of an AI-powered SNS platform, architecting backend infrastructure on **Supabase** with **Row Level Security (RLS)** policies for enterprise-grade data protection
- Designed and implemented a secure authentication system supporting **OAuth 2.0** (Google, Facebook) and custom email flows, now in demo phase with positive client feedback on reliability and UX
- Translated CEO and executive team product vision into technical roadmaps, delivering 3 major feature releases on schedule
- Engineered and tested AI bot personas using prompt engineering, maintaining consistent conversation quality across diverse user scenarios
- Established code quality standards through rigorous pull request and peer code review processes

PT. IoT Kreasi Indonesia | Tangerang, Indonesia

Jan 2021 – Present

Senior Frontend Developer

- Developed the flagship IoT monitoring platform, featuring real-time device dashboards, automated logging systems, and downlink command interfaces managing 10,000+ connected devices
- Standardized the frontend stack across the IoT division, establishing **React and Next.js** best practices adopted by a 6-person development team
- Built enterprise ticketing and automated billing modules, digitizing the complete service lifecycle from installation to payment processing
- Implemented dynamic **SEO infrastructure** (automated RSS feeds, robots.txt, sitemap.js), increasing organic traffic by 45%
- Optimized platform performance via **Incremental Static Regeneration (ISR)** and AVIF/WebP formats, cutting average page load time from 4.2s to 1.1s
- Integrated **Keycloak SSO** with a microservices architecture, unifying authentication across the IoT platform and ERP systems

80&Company | Kyoto, Japan (Remote)

Jul 2024 – Jul 2025

Frontend Developer (Freelance)

- Developed a crypto-based job search platform using **Next.js** and **TypeScript**, implementing wallet authentication and blockchain transaction features
- Optimized high-traffic **Shopify** e-commerce templates for KOSE MUWMAZE, improving mobile Core Web Vitals scores by 35%
- Maintained code quality through comprehensive PR reviews and collaborative peer programming sessions

Kisah Kreatif | Jakarta, Indonesia (Remote)

Feb 2023 – Mar 2024

Technical Lead & Frontend Developer (Freelance)

- Delivered the Pilog logistics website for PT. Pupuk Indonesia Logistik using **Next.js**, processing 500+ daily shipment tracking requests
- Architected a secure Learning Management System with forced-fullscreen anti-cheating mechanisms, preventing 99% of examination violations

- Led a 3-person development team through the full project lifecycle, from requirements gathering to production deployment

PT. Trimagnus Prima Dharma | Jakarta, Indonesia (Remote)

Jan 2020 – Jan 2021

Fullstack Developer

- Transformed a 30%-complete IoT prototype into a market-ready product, now the flagship asset of PT. IoT Kreasi Indonesia with 50+ enterprise clients
- Built an end-to-end e-commerce platform (product catalog, cart, payment gateway, order management) for Hoops Indonesia
- Mitigated critical security vulnerabilities in the transaction system, ensuring PCI-DSS compliance and zero security incidents during tenure
- Built custom ERP modules for Wira Energy using **Laravel and MySQL**, streamlining operational workflows by 30%

PT. Allbest Solusi Sistem | Jakarta, Indonesia

Sep 2019 – Dec 2019

Frontend Developer

- Developed UI modules for the CEISA 4.0 customs declaration system (Bea Cukai), processing 1,000+ daily transactions
- Implemented responsive data tables and form validation with **JavaScript and Ant Design**, reducing data entry errors by 25%

PT. Delta Sinergi Prima | Jakarta, Indonesia

Jan 2019 – Jun 2019

Frontend Developer

- Assisted senior developers in building an internal management dashboard using **PHP and MySQL**
- Created technical documentation and user manuals for 3 internal applications

KEY OWN PRODUCT HIGHLIGHTS

- **NiatKawin:** Engineered and launched a mobile wedding-management application on the Google Play Store. Directed the end-to-end product lifecycle, encompassing system architecture, GCP services integration, feature prioritization, and continuous iterative releases

TECHNICAL SKILLS

- **Frontend Core:** Next.js (App Router), React.js, Astro, TypeScript, JavaScript (ES6+), Tailwind CSS, Shopify Liquid, HTML5, CSS3, Responsive Design
- **Backend & DB:** Node.js, Laravel, Supabase (Auth, RLS, PostgreSQL), REST APIs, WebSocket, Microservices Architecture
- **Security & Auth:** Keycloak SSO, OAuth 2.0, OpenID Connect, Row Level Security (RLS), JWT, Session Management
- **Performance & SEO:** SSR, Incremental Static Regeneration (ISR), SSG, Core Web Vitals, JSON-LD Structured Data, Dynamic Sitemap Generation, RSS, robots.txt, AVIF/WebP Optimization
- **AI & Optimization:** Prompt Engineering, AI Bot Persona Design, Generative AI Integration (Gemini, IBM Granite, Dify), Fine-tuning LLM Models
- **DevOps & Cloud:** AWS Amplify, Vercel, Git, GitHub Actions, Docker, CI/CD Pipelines
- **Management:** Technical Planning, Stakeholder Management (C-Level), Agile/Scrum, POC Development, Code Review, Mentoring

EDUCATION

- **BINUS University Online Learning** — B.Tech in Management Information Systems (Expected 2026)
- **Pijar Camp** — Fullstack Developer Bootcamp (2019)

AWARDS & CERTIFICATIONS

- **1st Winner, OCTO-PATH Dify AI Hackathon 2025** (hosted by 80&Company)
- **AI & Machine Learning:** IBM Granite (Code Gen), Alibaba Cloud (GenAI Developer), Google Cloud (10+ GenAI & ML Skill Badges), Dicoding (AI Fundamentals)
- **Software Development:** Python & Data Viz, Django Bootcamp, Arkademy Fullstack (2019)
